

SEAGATE

LYVE™ Cloud

LYVE CLOUD CERTIFICATION PROGRAM

Seagate® Lyve™ Cloud is an always-on, mass-capacity, object-storage platform designed to enable multicloud freedom at the metro edge.

With zero add-on charges for API or egress, Lyve Cloud helps enterprises overcome vendor lock-in, unpredictable cloud total cost of ownership, and multicloud data management complexity.

With the **Lyve Cloud Self-Certification Program**, you'll have opportunities to grow your customer base. **Seagate Lyve Cloud enterprise and startup customers will be exposed to your product**, helping you to stand out from other independent software vendors, and build customer loyalty and satisfaction.

How Do You Get Lyve Cloud Certified?

Joining the program is easy. Submit a compatibility test featuring your product and Lyve Cloud to the Seagate team for review. After your product is certified, you can join the **Lyve Cloud Partners Network** and work with our alliances team.

Once you become a Lyve Cloud technology partner, Seagate co-marketing and promotional opportunities will shine the spotlight on your product and bring it to the attention of a variety of new prospects.

Are You a Startup?

After completing the Lyve Cloud Self-Certification, you'll also be eligible to join **Lyve Cloud for Startups**, giving your organization access to up to 1PB of storage in an S3-compatible cloud. Join the program to enjoy Seagate Lyve Cloud's expert support, powerful brand exposure, and multicloud freedom.
