

DATA SHEET

Trusted. Efficient. Versatile.

Exos 7E2

The Seagate[®] Exos[™] 7E2 enterprise hard drives with 1TB and 2TB capacities are specifically designed to address the needs of storing unstructured data cost-effectively. The traditional 512-native format with a 6Gb/s SATA interface ensures easy integration into legacy storage servers and systems.

Best-Fit Applications

- Legacy mainstream applications requiring 512n block size
- Hyperscale applications/cloud data centers with replicated storage
- Scale-out data centers and Big Data analytics
- High-capacity density RAID storage
- Mainstream enterprise external storage arrays (SAN, NAS, DAS)
- Distributed file systems, including Hadoop and Ceph
- Enterprise backup and restore—D2D, virtual tape
- Centralized surveillance

Reliable Data Center-Grade Hard Drive Within Reach

The Exos 7E2 hard drives support up to 2TB per drive, ¹ offering economical storage for traditional 512-native infrastructures requiring a highly reliable enterprise hard drive. Exos 7E2 provides the most cost-effective, reliable access to unstructured data in bulk storage applications. Built on field-proven 9th generation conventional magnetic recording (CMR) technology, the Exos 7E8 drive helps to catalyze the datasphere, enabling data center architects and IT professionals to deliver trusted performance, rock-solid reliability, ironclad security and low TCO for demanding 24×7 operations.

Robust Bulk Data Storage for a 24×7 World

The Exos 7E2 hard drives are proven, enterprise-class hard drives with enterprise-grade reliability backed by a 2 million hour MTBF rating. With state-of-the-art cache, on the fly error-correction algorithms and rotational vibration design, the Exos 7E2 helps ensure consistent performance in replicated and RAID multi-drive systems.

Consistent, High Performance and Compatibility for Legacy Data Center Applications

Meet your storage workload requirements with the most efficient and cost-effective SATA 6Gb/s drive in a 3.5-inch data center footprint. With user-definable innovative technology advancements like PowerChoice $^{\text{TM}}$ and Seagate RAID Rebuild $^{\text{(B)}}$, you can tailor your bulk storage requirements for even greater improvements in your TCO.

Enhanced Enterprise Reliability, Data Protection and Security

The Exos 7E2 series delivers firmware security features to help protect data where it lives—on the drive. Exos 7E2 hard drives safeguard firmware with authentic Secure Downloads & Diagnostics.

1 Seagate recommends validating your configuration with your HBA/RAID controller manufacturer to ensure full capacity capabilities.

| Specifications | 512n SATA | |
|------------------------------------------------|--------------------|--------------------|
| Capacity | 2TB | 1TB |
| Base Model | ST2000NM0008 | ST1000NM0008 |
| Features | | |
| SuperParity | Yes | Yes |
| Low Halogen | Yes | Yes |
| PowerChoice [™] Technology | Yes | Yes |
| Seagate RAID Rebuild® Technology | Yes | Yes |
| SD&D Firmware Security | Yes | Yes |
| Cache | 128MB | 128MB |
| Reliability/Data Integrity | | |
| Vibration, Nonoperating: 10Hz to 500Hz (Grms) | 5 | 5 |
| Mean Time Between Failures (MTBF, hours) | 2,000,000 | 2,000,000 |
| Reliability Rating @ Full 24×7 Operation (AFR) | 0.44% | 0.44% |
| Nonrecoverable Read Errors per Bits Read, Max | 1 sector per 10E15 | 1 sector per 10E15 |
| Power-On Hours per Year (24×7) | 8,760 | 8,760 |
| Bytes per Sector | 512 | 512 |
| Limited Warranty (years) | 5 | 5 |
